Lecture topics

Crisis management in public systems
Drawn from commanding a nationwide unit in wartime.

From hospital to home
The breaking point for combat-wounded soldiers, and what systems must do differently.

HR in prolonged emergencies
Building volunteer networks and leading people over time.

The TLM model & Predictive Recovery
From reaction to prediction: multi-agency integration, proactive outreach and a 360° envelope.

Time, priorities and meaning
Based on the book "You Have One Week to Live".

Inclusion
Including people with disabilities in the community, drawn from municipal work.

AI in nonprofits and social organizations
Getting started with AI tools in a small team: time savings, privacy and ethics.

At a glance

Audiences: organizations, local authorities, academic institutions and public bodies

Languages: Hebrew and English

Format: in person and on Zoom
